

Project Name:	CalorieMate
Team:	The Innovators
Project Description:	<p>For health-conscious users who want to easily track their food intake and manage their diet, the CalorieMate app is a smart, AI-powered solution that automatically identifies food from photos, calculates nutrition, and offers personalized meal suggestions.</p> <p>Unlike traditional calorie-tracking apps that require manual data entry, our application provides a fast, hassle-free way to track calories and nutrition, saving time and improving accuracy.</p>
Benefit Outcomes:	<ul style="list-style-type: none"> • Time Savings: Users can quickly track their meals through photo analysis without manual data entry. • Improved Accuracy: AI provides precise estimates for calories and nutrients, reducing guesswork. • Health Goal Support: Personalized diet plans help users stay on track with their weight loss, muscle gain, or overall wellness goals. • Convenience: Barcode scanning for packaged food makes nutritional tracking fast and effortless. • Consistency: Easy tracking and user-friendly features increase engagement, encouraging long-term healthy habits.
